

# HIGH-PERFORMANCE ALL-ROUNDERS

If printing were an Olympic sport, we would definitely have an almost unbeatable team on board, in the shape of the P-C3062DN/P-C3562DN/P-C4072DN A4 colour printer series. Our team would possess all the necessary skills to set records in the office athletics competition. These printers' talents include an intuitive user interface to appeal to their audience, a high paper capacity for high endurance, a decathlon-worthy range of media and first-class printing quality. They also communicate well with smartphones, tablets, software and networks. But best of all, they perform well while consuming little energy.

 COLOUR PRINTER / A4  
**P-C3062DN**  
**P-C3562DN**  
**P-C4072DN**

## HIGHLIGHTS:

**Quality and quantity:** Due to remarkable printing speeds of 30, 35 or 40 A4 pages per minute, these colour systems offer high output in a short period of time, and therefore the ability to work faster. Thanks to a high printing quality of 1,200 x 1,200 dpi, you can benefit from excellent print results that will impress even the most quality-conscious boss. Texts and even fine lines are reproduced in high-definition.

**Range of media:** Versatility and flexibility are key qualities of these print systems. The optional expansion to the standard equipment, with a maximum of three additional paper cassettes, offers an input capacity of up to 2,100 sheets. This way, you can avail yourself of different media for different purposes at the same time. These professional printers effortlessly process print media in the formats A6R to A4, with paper weights of up to 220 g/m<sup>2</sup>. And they don't shirk from labels, envelopes or coated paper, either.

**Independence:** In these times of increasing mobility, you need to be able to create documents from any end device, irrespective of location. To this end, the three print systems support printing via the free Mobile Print app or Google Cloud Print and, optionally, printing via WLAN and Apple AirPrint. A wireless connection can even be established between the printer and your Wi-Fi enabled end device via the optional function Wi-Fi Direct — all without a router.

**Economy:** It doesn't matter if your device is working under high pressure or on stand-by — this printer series is characterised by its particularly economic operation irrespective of operating mode, which is positively reflected in your cost balance. Thanks to their integrated energy-saving functions, these systems don't just print rapidly, but also in an energy-efficient and environmentally friendly way.

UTAX has been a trade mark for professional office technology since 1961. As the partner of a German wide dealer network and international distribution, we are specialised in the distribution and integration of printing, copying and multifunctional systems in corporate IT and public sector, amongst others. With the MDS solution UTAX smart for example, output systems can be controlled regardless of the manufacturer and the infrastructure can be optimised in line with demands. UTAX recommends the use of original UTAX accessories for trouble-free operation of your system. For recommended print media refer to the user manual. UTAX and the UTAX logo are registered trade marks of TA Triumph-Adler GmbH. All other brand names referred to are registered trade marks of the respective manufacturers.
